Experience

Partner Israel - **Full-Stack Developer**

2022 - present

- Skilled in Angular and C# .NET.
- Architecting and implementing web applications, for comprehensive end-to-end development.

Reichman University - **Academic Tutor and Teaching Assistant**

2019 - 2021

- “Advanced Programming” course – teaching and tutoring Python, Java, SQL, HTML, JavaScript, various Computer Science concepts.
- "System Programming in C and Unix" course – writing and checking assignments and exams.

IDF - **Computer Systems Technician**

2011 - 2014

- “TAMAM” course – computer networks, configuration and operation of routers, switches, and encryption systems.
- Managing computer systems and communication equipment in operation rooms and vehicles.

Education

2020
Reichman University (IDC) – *Herzliya*
B.Sc. - Computer Science

2022
Rimon School of Music – *Ramat HaSharon*
Music and performance studies

2011
Givat Ram Ort College – *Jerusalem*
Technologic Atuda Studies – “Yud-Gimmel” – algorithms and programming studies.

2010
Sieff & Marks School – *Jerusalem*

- **10 study units in Computer Science** (C# and Assembly).
- **MIT University** – MEET software engineering program in Israel (Java).

Projects

Machine Learning (Python):

- Custom implementations of ML algorithms, such as tSNE and AdaBoost.
- Creation of a CNN model for predicting a song's genre, with an accuracy score of 0.85+. project report.
- Other implementations - gradient descent, decision trees, etc. (Java).

Cloud (Python):

- An AWS app that manages parking lots data and charges. GIT.
- An AWS app of a full text messaging system backend. GIT.
- Docker app of a library system with NGINX routing and load balancing. GIT.

OOP – Applications and Games (logics and UI):

- Various games vs. machine – Checkers (C#), Blackjack (Assembly), etc.
